Furniture

Capability Statement

Core Competencies

ekō Solutions is a Land Betterment portfolio company focusing on sustainable development and modular building utilizing impactful, low-cost, up-cycled shipping container and other metal structures to provide durable, high-end solutions to the building marketplace while also maintaining the ability to be utilized in a mobile environment. ekō Solutions uses innovative ecological structures to replace legacy inefficient and ineffective methods of living, growing and working. Our structures are suitable for farming, residential, crisis recovery, commercial, and recreation use.

Differentiators

1. Controlled Quality Manufacturing: All products are processed through a rigorous inspection process throughout the manufacturing process. ekō Solutions' quality assurance policy ensures every customer is satisfied, and every project brings value.

2. Modular Licensing / Compliance: All modular units are built to NEC, IRC, ANSI, and IPC Required Codes.

3. Development Time: In-house design and engineering allows for improved development time from concept to complete product.

4. Product Durability: Products are designed with durability and aesthetic quality in mind.

5. Versatility and Agility: ekō Solutions' agile team can provide customers with solutions to unique problems and needs.

6. Environmentally and Socially Responsible: ekō Solutions was born out of a commitment to sustainability. Our foundation is built on a zero-tolerance policy for waste. We remove raw materials in the form of shipping containers from the waste stream, making our processes and products inherently sustainable. This delivers value and cost savings to our customers.
